

BHARGAV BHAT

+91-8073897451 | Bengaluru, India | bhargavbhathosmane321@gmail.com | linkedin.com/in/bhargavbhat18 | github.com/bhargavbhat18

PROFESSIONAL SUMMARY

Detail-oriented Full Stack Developer with technical expertise in Java, Spring Boot, REST APIs, SQL, and Python. Passionate about engineering scalable web applications and AI-driven solutions. Proven collaborator and leader, combining robust problem-solving capabilities with structured execution skills demonstrated across high-impact initiatives, including the TEDxGCEM Production Team.

EDUCATION

Gopalan College of Engineering and Management , Bengaluru, India	2023 – Present
<i>Bachelor of Engineering (B.E.), Information Science & Engineering, CGPA: 7.82</i>	
M.E.S. Chaitanya PU College , Sirsi, Karnataka, Percentage: 79%	2021 – 2023

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL
Frameworks & APIs: Spring Boot, REST APIs, React.js
Databases & Web: MySQL, HTML, CSS
Developer & AI Tools: Git, GitHub, VS Code, IntelliJ IDEA, Android Studio, ChatGPT, Google Gemini, Claude, GitHub Copilot

PROJECTS

- E-Commerce Web Application** • *Java, Spring Boot, REST APIs, MySQL*
- Architected a robust full-stack e-commerce platform incorporating microservices architecture patterns.
 - Designed and deployed production-ready REST APIs for secure user authentication, catalog management, and seamless order tracking loops.
 - Optimized relational database schemas inside MySQL to guarantee high data integrity and transactional consistency during checkout processes.
- Theater Seat Booking System** • *Java, Spring Boot, MySQL, REST APIs*
- Developed a high-concurrency web application managing real-time seat selection, automated booking processing, and checkout workflows.
 - Implemented database constraint rules and atomic workflows inside MySQL to robustly eliminate double-booking application faults.
 - Created clean backend payment orchestration APIs, drastically boosting booking system responsiveness.

LEADERSHIP & EXPERIENCE

- Production Team Member** | TEDxGCEM 2025
- Coordinated multi-tier stage logistics, technical equipment arrays, and media operations to facilitate a flawless event production lifecycle.
- Participant** | Smart India Hackathon 2025
- Engineered an enterprise Java-based backend architecture featuring dynamic external API integration to tackle highly scoped real-world problem statements.
- Production Head** | Estralis College Fest 2026
- Orchestrated full-scale technical operations and logistics matrices, leading cross-functional delivery teams for a high-turnout campus festival.

CERTIFICATIONS & ADDITIONAL INFORMATION

- Validated technical expertise through professional certifications from **Udemy, Infosys, Coursera, and Edubridge** in Java Full Stack Development, Spring Boot, and Generative AI systems.
- Languages:** Kannada (Native), English (Professional), Hindi (Conversational).
- Interests:** Open-Source Contribution, Cricket, Music and Strategic Gaming.
